FBMG Help Desk Question of the Week

I would like Bluebonnets in my yard and garden. When and how should I plant them?

Answer: They can be a wonderful addition to the home garden, now is the time for viewing bluebonnets and wildflowers.

The Texas State Flower

Bluebonnets dot the landscape each year from late winter to early spring.

Bluebonnets are Annuals

In one year, they are able to complete their entire life cycle from seed germination to development of roots, stems, leaves, flowers and producing seeds.

They are well adapted to drought and freeze.

It is this versatility that will help you make the Bluebonnet a welcome addition to your home landscape.

Lady Bird Johnson Royal Blue Bluebonnet A Texas Superstar

After extensive trials the Lady Bird Johnson Royal Blue Bluebonnet emerged as a true Texas Superstar!

- Amazing Color
- More blooms than the traditional bluebonnets
- easy to propagate
- produces 40 % more seed
- easy to grow from seed or transplant
- does well in a variety of settings

Lady Bird Johnson Wildflower Center may be a great location to see some. Check before you drive. <u>https://www.wildflower.org/</u>

Good for the soil and the pollinators Butterflies and Bees

Host to some Gossamer-winged butterflies (family Lycaenidae) made up of 100's of species such as hairstreaks, harvesters, and elfins.

Additionally Bluebonnets Povide Nectar and Pollen for a Vaiety of Bees

A member of the pea (legume) family

Bluebonnets enhance and enrich the soil by producing nitrogen, an essential nutrient for plants ability to complete their life cycle from seed germination, to development of roots, stems, leaves, flowers and seeds.

Bluebonnets are Beautiful in the Garden Some Simple Steps to get Started

Bluebonnets are native to Texas and grow freely in the wild. They do best when given minimum attention.

For Best Results Plant:

- In full sun
- In well draining soil
- Use chemically scarified seed or transplants
 o don't bury the crown when planting
 - don't completely bury the seeds
- Sow or plant in the fall
- Be careful not to overwater

Growing Bluebonnets in Bermuda Grass It takes a bit of effort to get Bluebonnets started in the Lawn

To help ensure success in overseeding Bluebonnets; The lawn must be Bermuda or Zoysia. (Bermuda is best) Needs a daily minimum of 8-10 hours of direct sun. Watering is only done if normal winter rainfall is not received.

The overseeding process includes:

- Using an aerator that removes soil plugs, aerate the Bermuda before Thanksgiving.
- Sow the seed on the aerated area.
- Work the seed into the roughed up turf and the holes with a fine rake or a broom.
- Water the seed in thoroughly.

You should have bluebonnet plants putting down roots and enriching your soil with nitrogen over the winter and rewarding you with lovely blooms in the spring. Remember to mow the lawn after blooming.

ST. AUGUSTINE WILL NOT WORK CAUTION: As a broadleaf plnat, broadleaf herbicides will harm Bluebonnets.

Compliment with Companion Plants Increase the Wow with Companion Plants

Bluebonnets make great companion plants for cold wint<mark>er annuals like pansies an</mark>d

warm weather perennials such as lantana in containers, & raised flowerbeds.

- Fall/Winter annuals will provide color until the bluebonnets bloom in spring
- Once the bluebonnet blooms start to fade summer blooming annuals or perennials can shine until fall.
- Most important is to make sure that the soil is well drained and there is plenty of sunlight.

Bluebonnets & other Spring Flowers

For Texas Wildflowers Spring is the one of the best times to view and Fall is the best time to plant!

> There are a variety of wildflowers to choose from at the Texas Department of Transportation regional seed list https://www.txdot.gov/about/campaigns-outreach/bluebonnetswildflowers/regional-seed-list.html

The Highways and Byways May provide a view!

When they are blooming Bluebonnets can be found in a variety of places,
to include the side of the road, a botanical garden or a park just to name a few.

If you decide to go and make an outing of it remember to take only pictures and to not trample the flowers. As always keep an eye out for wildlife; mammal, reptile, bird, butterfly, bee. Snap photos!!!

Do you have questions about your home landscape and plants?
